

Optimal Dental Health Program

What is it?

The Optimal Health Program is an annual prepaid savings program for routine dental care that offers an extra discount on other treatment during that year. The program is a way to receive a savings on quality dental care without annual maximums, pre-determinations, exclusions or waiting periods.

How does it work?

Pre-pay for your annual x-rays/exam and hygiene visits and receive significant savings. The program lasts for 1 year and program members also receive 10% off treatment*, including fillings, crowns, bleaching, and other cosmetic procedures.

How is the Optimal Health Program Different than my Dental Insurance?

The Optimal Health Program gives you freedom to choose the type of care you wish to have without a third party "Approving" or "Denying" your choices. The dollars you spend for dental care go only towards your dental care.

What about Payments for Treatment beyond what's included

You will receive 10% off your treatment plan. This payment is expected at the time of service in full, unless another financial arrangement is made in advance. We accept Cash, Check or Credit Card.

*** If extended payment plans are utilized, the discount will stay the same, but there may be additional financing charges, due to costs incurred by our office.
